Isaac Weiss (icw0001) and Michael Little (mcl0075)

Intro to Networks

November 1, 2023

Assignment 2 Report:

The program works as intended.

You can run this program by compiling all the files in the root folder (root folder of the zipped

folder): javac *java

After compilation, run java RecvTCP <port> on the server (our port was 10060).

Run java SendTCP <destination ip> <port> on the client (replace

<destination_ip> with the IP address of the server and the same port number used above). By

using RecvTCP.java on the server and SendTCP.java on the client you are able to emulate a TCP

client-server program and the NumberToString conversion.

Minimum round-trip time: 3ms

Average round-trip time: 15ms

Maximum round-trip time: 54ms

```
Select OpenSSH SSH client
                                                                                                                     mcl0075@tux064:~$ date
